DETAILED ACTION

Allowable Subject Matter

1. Claims 1-8 are allowed.
2. The following is a statement of reasons for the indication of allowable subject matter:

Claim 1 is allowable over the prior art of record since the cited references taken individually or in combination fails to particularly disclose **a constant amplitude coded bi orthogonal modulator for performing the constant amplitude coded bi orthogonal modulation for the output data of the error bit polarity converter, and a distance comparator for comparing the bit by bit distances between the received orthogonal modulated data and the output of the constant amplitude coded bi orthogonal modulator; and a buffer for storing the serial data output from the error bit polarity converter and selectively outputting the corresponding the serial data as demodulated data dependent on a control signal from the distance comparator.**

It is noted that the closest prior art of record, Jung (US 6668352) shows a receiving device within the CDMA environment receiving data, serial to parallel converting this data, and performing parity checking on the parity bits. Jung goes on to disclose in the event that an error has occurred in the checking of the parity bits, inverting/converting the parity and then parallel to serial converting the parallel data and

sending it on to a decoder. However, Jun fails to disclose or render obvious the above underlined limitation as claimed.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher P. Grey whose telephone number is (571)272-3160. The examiner can normally be reached on 10AM-7:30PM.
